

Opel Vectra C / Signum

Changed filling levels

The filling level of the refrigerant and/or compressor oil has changed with some of the above-mentioned models. The currently valid filling levels are as follows:

Engine	Model year	Refrigerant level R134a	OE compressor oil type	Hella compressor oil type	Compressor oil filling level
Z16XE, Z18XE, Z32SE, Z20NET, Z22SE, Z22YH, Y20DTH, Y22DTR	Up to 2005	730 g	90509933	PAO 68 or PAG ISO 46	120 ml
Z19DT, Z19DTH	Up to 2005	730 g	90509933	PAO 68 or PAG ISO 46	135 ml
Y30DT	Up to 2005	680 g	90509933	PAO 68 or PAG ISO 46	120 ml

Since technical/design-related changes by the vehicle manufacturer are always possible, the filling levels can change again. Which means these specifications are not guaranteed.
