

Opel Zafira (F75) up to model year 2005

Changed filling levels

The filling level of the refrigerant and/or compressor oil has changed with some of the above-mentioned models. The currently valid filling levels are as follows:

Engine	Model year	Refrigerant level R134a	OE compressor oil type	Hella compressor oil type	Compressor or oil filling level
All	Up to 2001 without rear evaporator	700 g	90509933	PAO 68 or PAG ISO 46	120 ml
All	Up to 2001 with rear evaporator	950 g	90509933	PAO 68 or PAG ISO 46	240 ml
All (except Z20LET)	From 2002 without rear evaporator	600 g	90509933	PAO 68 or PAG ISO 46	120 ml
All (except Z20LET)	From 2002 with rear evaporator	725 g	90509933	PAO 68 or PAG ISO 46	240 ml
Z20LET	From 2002 without rear evaporator	700 g	90509933	PAO 68 or PAG ISO 46	120 ml
Z20LET	From 2002 with rear evaporator	800 g	90509933	PAO 68 or PAG ISO 46	240 ml

Since technical/design-related changes by the vehicle manufacturer are always possible, the filling levels can change again. Which means these specifications are not guaranteed.
